ENERGYNET IS PRIMARY SOURCE FOR LEASE SALES

Hosting Sealed Bid and Auction Sales for Eight Federal & State Government Agencies

JOHN MUNROE

*VICE PRESIDENT OF ENGINEERING/
GOVERNMENT LEASE SALES*

The EnergyNet Government Lease Sales team currently works with eight federal and state government agencies, exclusively hosting their online sealed bid and auction lease sales. Many state agencies experienced unexpectedly successful third quarter lease sales this year. The proceeds of the lease sales provide funding for the agencies' various endowment programs, which range from schools and universities to hospitals, state parks, and veteran programs.

In the third quarter, EnergyNet Government Lease Sales hosted nineteen lease sales, covering 1,684 parcels or tracts over 714,550 acres, and featured high profile plays such as the Powder River and Permian Basins, and Niobrara Shale.

This year, all eight of the agencies made EnergyNet the primary source for their sealed bid and auction lease sales. The agencies now have a platform to connect with bidders, regardless of locale, who are interested in the various geologic plays available for lease. Bidders interested in properties extending from North Dakota's Bakken/Three Forks to Texas's Gulf Coast Basin, including the Gulf of Mexico, may review and bid on available leases by logging on to the EnergyNet Government Lease Sale site.

In the fourth quarter, seven BLM state offices offered lease sales, and the states of New Mexico, Utah, Colorado, Wyoming, Nevada, Montana, and Eastern States, also held lease sales. Twenty-two sales were scheduled, covering 1,100+ parcels or tracts with over 450,000+ acres.

Be sure to visit energynet.com and click on Government Listings for the sale calendar, details on current lease sales, and information on the registration process.
